Artificial Intelligence Application Development Practical
Module - II
Practical – IX

Roll No.:T054	Name:Priti Yadav
Class:TYIT	Batch:2
Date of Assignment: 23/09/26	Date/Time of Submission: 23/09/26

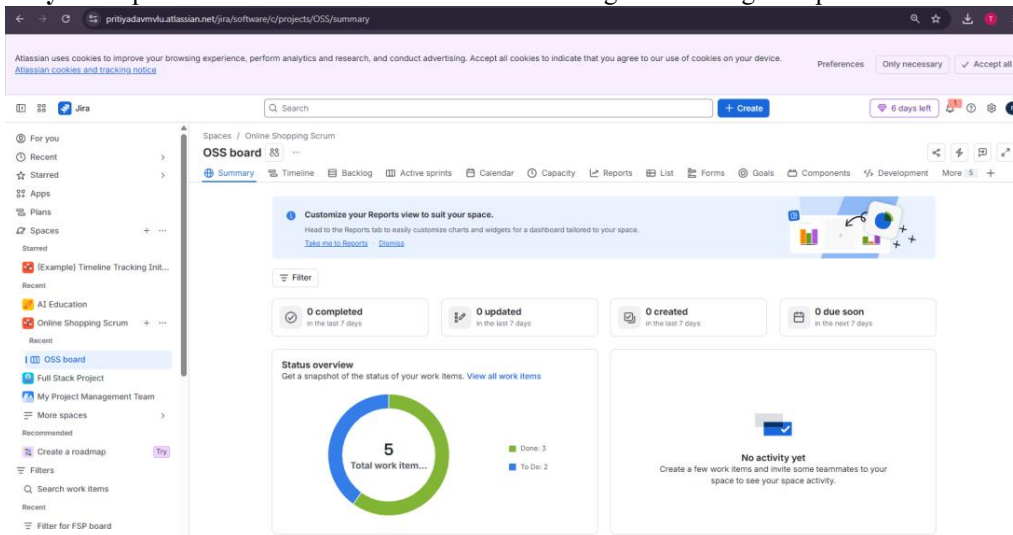

9. Reports & Dashboards

A. Generate Burndown Chart and Velocity Chart.

Step 1: Open More Reports

1. Open your Jira project.
2. Click Reports from the project menu.
3. Click More reports.
4. Select Burndown Chart.

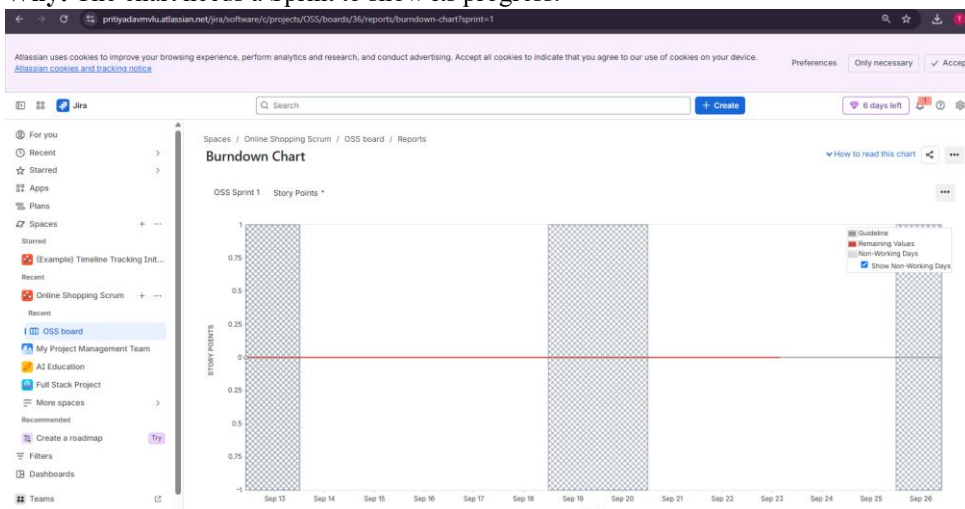

Why: We open the Burndown Chart to see the remaining work during the Sprint.

Step 2: Select Sprint

1. The Burndown Chart page will open.
2. Select the required Sprint.
3. Select the required time period if Jira asks.

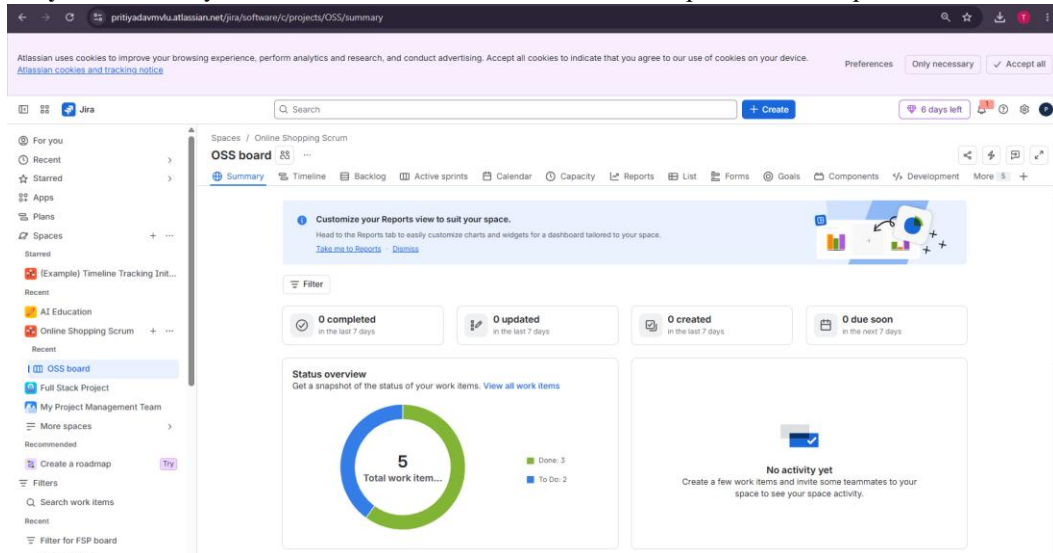

Why: The chart needs a Sprint to show its progress.

Step 3: Open Velocity Report

1. Go back to Reports.
2. Click More reports if required.
3. Select Velocity Chart.

Why: The Velocity Chart shows how much work the team completes in each Sprint.

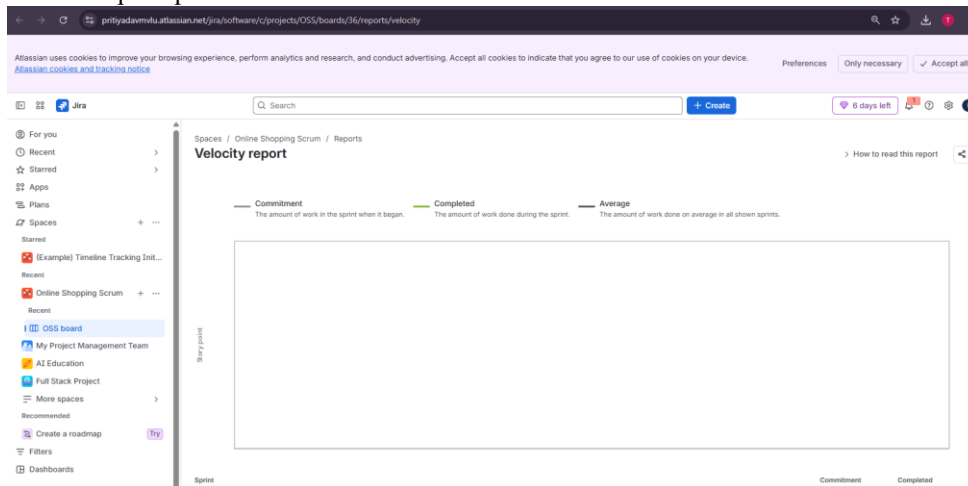

Step 4: Velocity Chart Output

The Velocity Report will open.

It displays information such as:

- Completed work
- Average
- Sprint performance

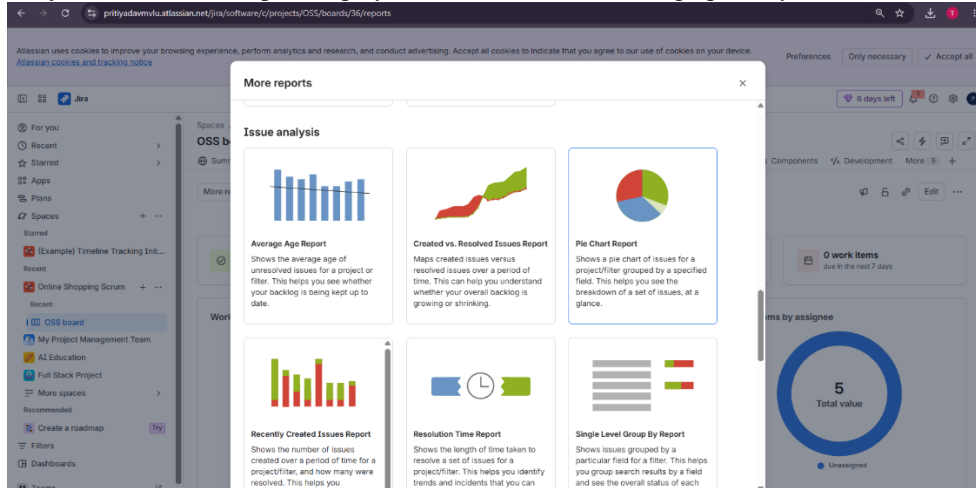

B. Create Pie Chart / Issue Statistics Report.

Steps1: Open More Reports

1. Click More reports.
2. Select Pie Chart Report.

Why: The Pie Chart Report displays the distribution of issues graphically.

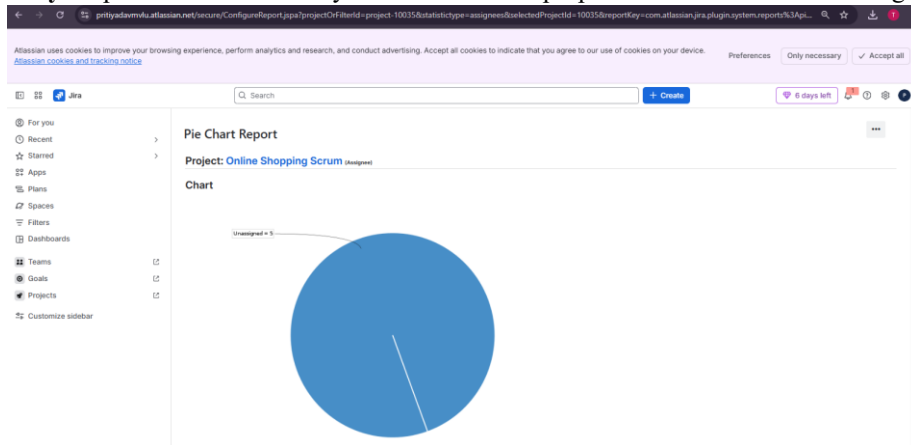

Step2: Pie Chart Report

1. The Pie Chart Report page will open.
2. Select the required project.

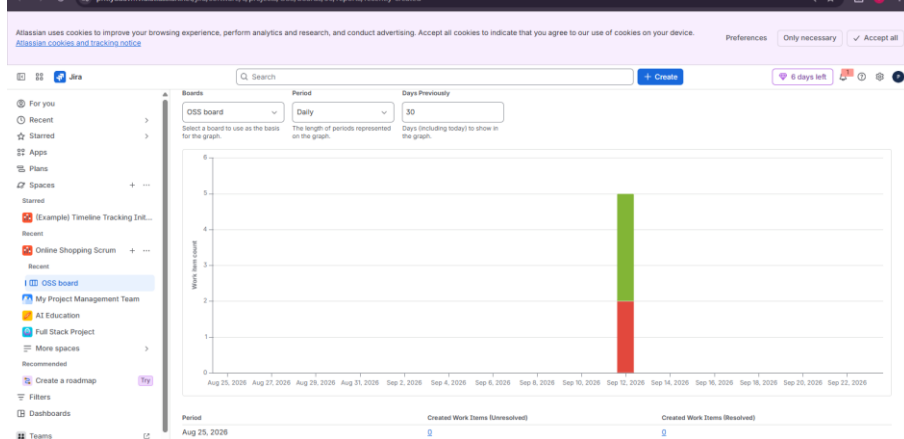

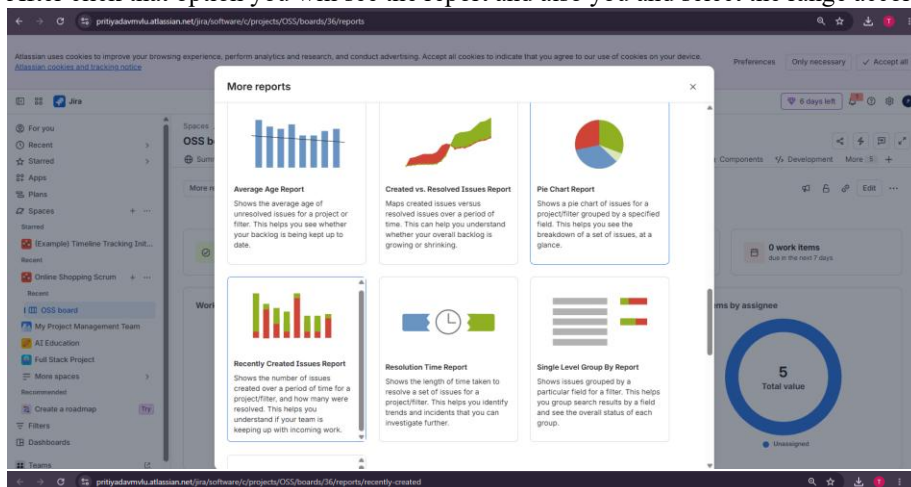

3. Select the required statistic/filter if available.
4. The pie chart will be displayed.

Why: A pie chart makes it easy to understand the proportion of different issue categories/statuses.

Step3: Click on Recently Created Issues Report.

After click that option you will see the report and also you can select the range according to your choice.

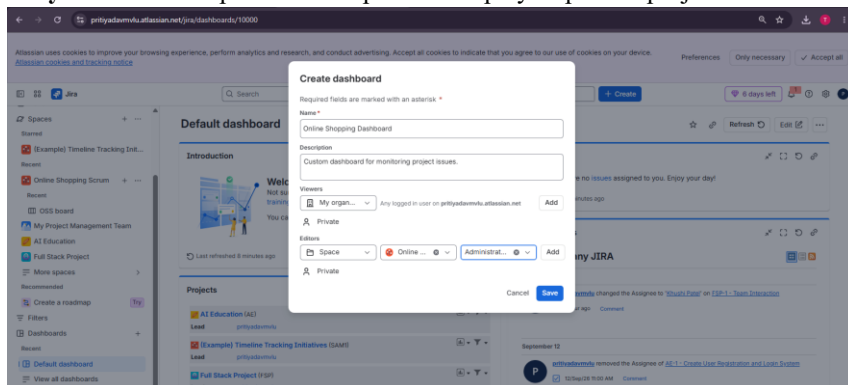

C. Create a Custom Dashboard with gadgets.

Step 1: Open Dashboards

1. From Jira's left menu, open Dashboards.
2. Select Create dashboard.

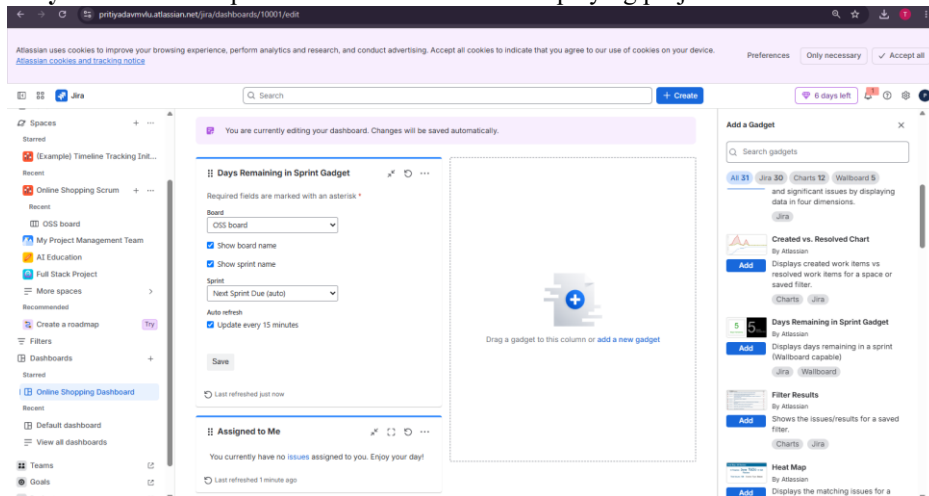

Why: A dashboard provides one place to display important project information.

Step 2 :Create Dashboard Window

1. The Create dashboard window will appear.
2. Enter:Name: Online Shopping Dashboard
3. Description:Dashboard for monitoring project progress and issue status.
4. Select the required sharing/access option and Click Save. and Dashboard Created

Why: This creates a personalized dashboard for displaying project information.

Step 3 :Add Gadget

1. Click Add gadget.
2. A list of available gadgets will appear.
3. Select the required gadgets.
4. Click Add gadget for the required gadgets.

Why: Gadgets display useful project information directly on the dashboard.

Step 4 :Configure Gadget

For example, for Filter Results:

1. Select the required filter.
2. Set the required number of results.
3. Click Save.

For other gadgets, enter the required project/filter details and click Save.

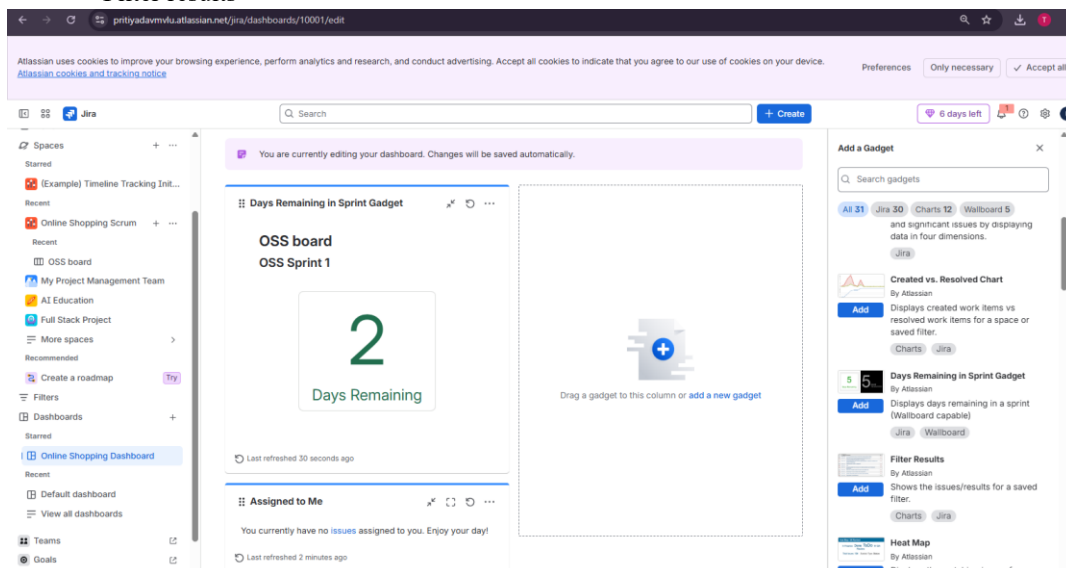

Why: Configuration tells the gadget what project information it should display.

Step 5 :Final Dashboard

After adding and configuring the gadgets, your dashboard will display the selected information.

For example:

- Sprint information
- Assigned issues
- Issue statistics
- Days remaining
- Filter results

Result: Thus, the Burndown Chart and Velocity Chart, Pie Chart/Issue Statistics Report, and Custom Dashboard with gadgets were successfully generated in Jira to monitor and analyze project progress.
