10.Permission & Security Management.

A. View and modify Project Permission Scheme.

Step 1: Open Permissions

1. Open project.
2. Click Space settings.
3. Click Permissions.

Why: This opens the permission settings of the project.

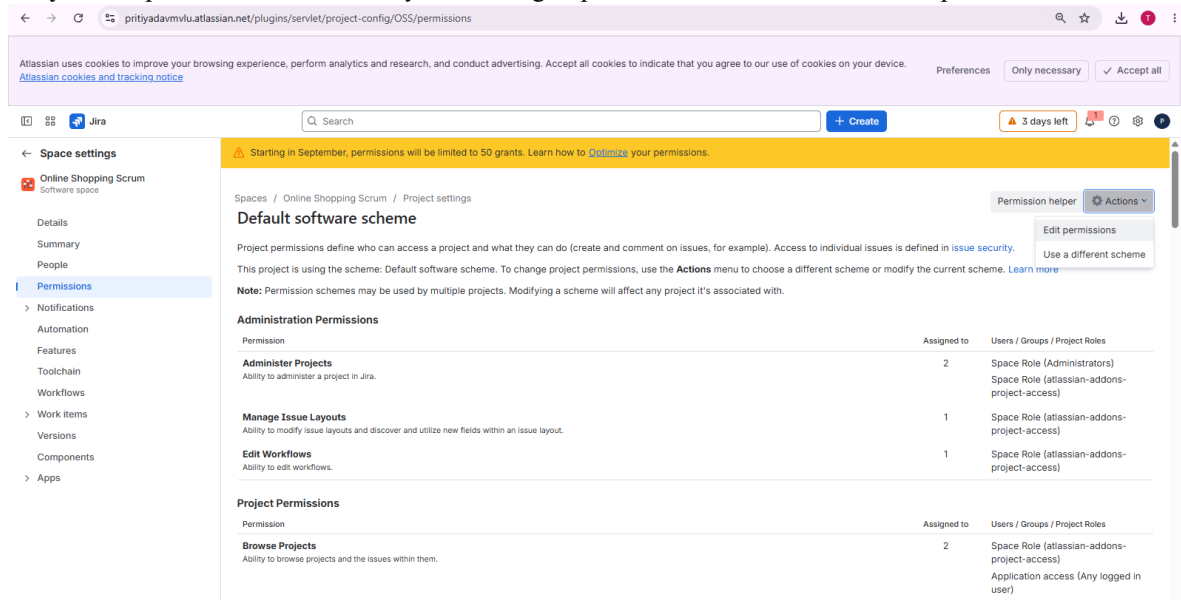

Step 2: View Permission Scheme

Why: This allows us to see who has access to different project actions.

Step 3: Edit Permissions

1. Click Actions on the right side.
2. Select Edit permissions.

Why: This option allows us to modify the users, groups, or roles that have the selected permission.

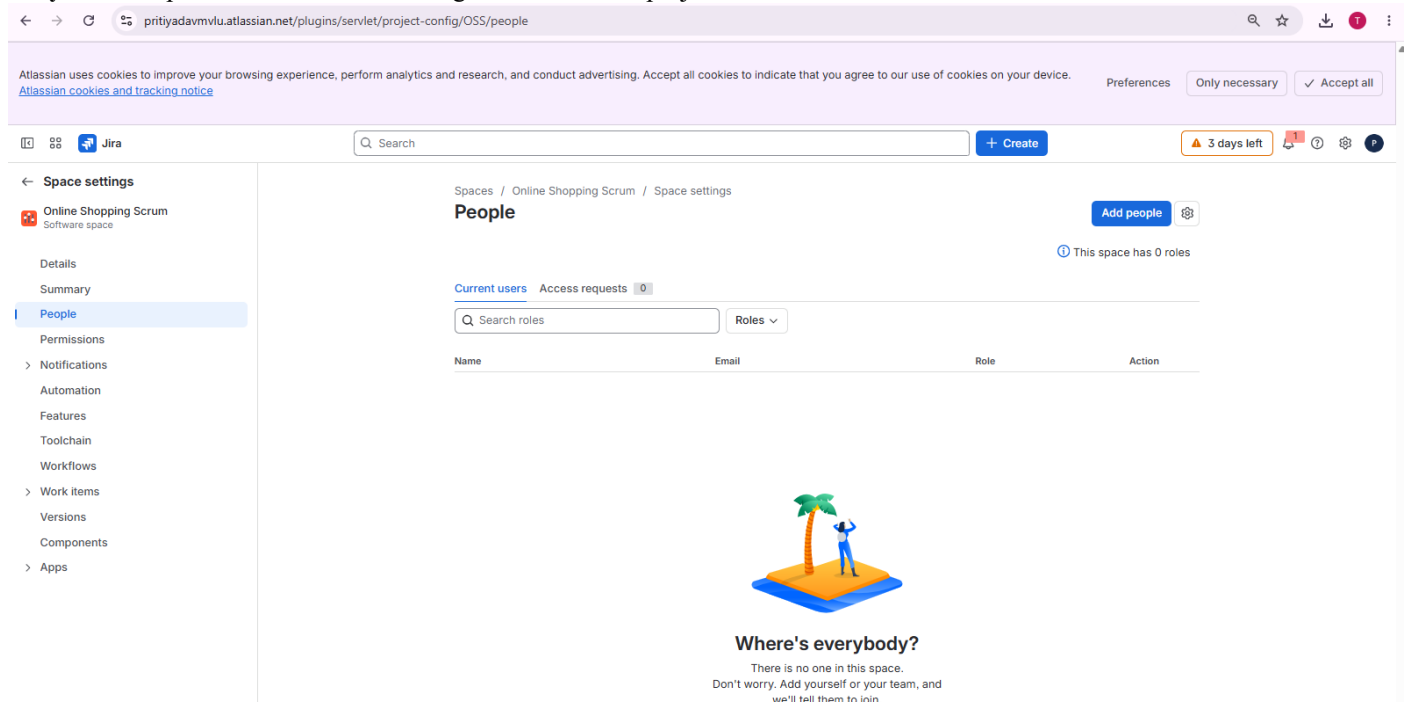

Result : The project permission scheme was successfully viewed and the required permissions were modified.

B. Configure Project Roles and assign permissions.

Step 1: Open People

1. Click Space settings.
2. Click People.

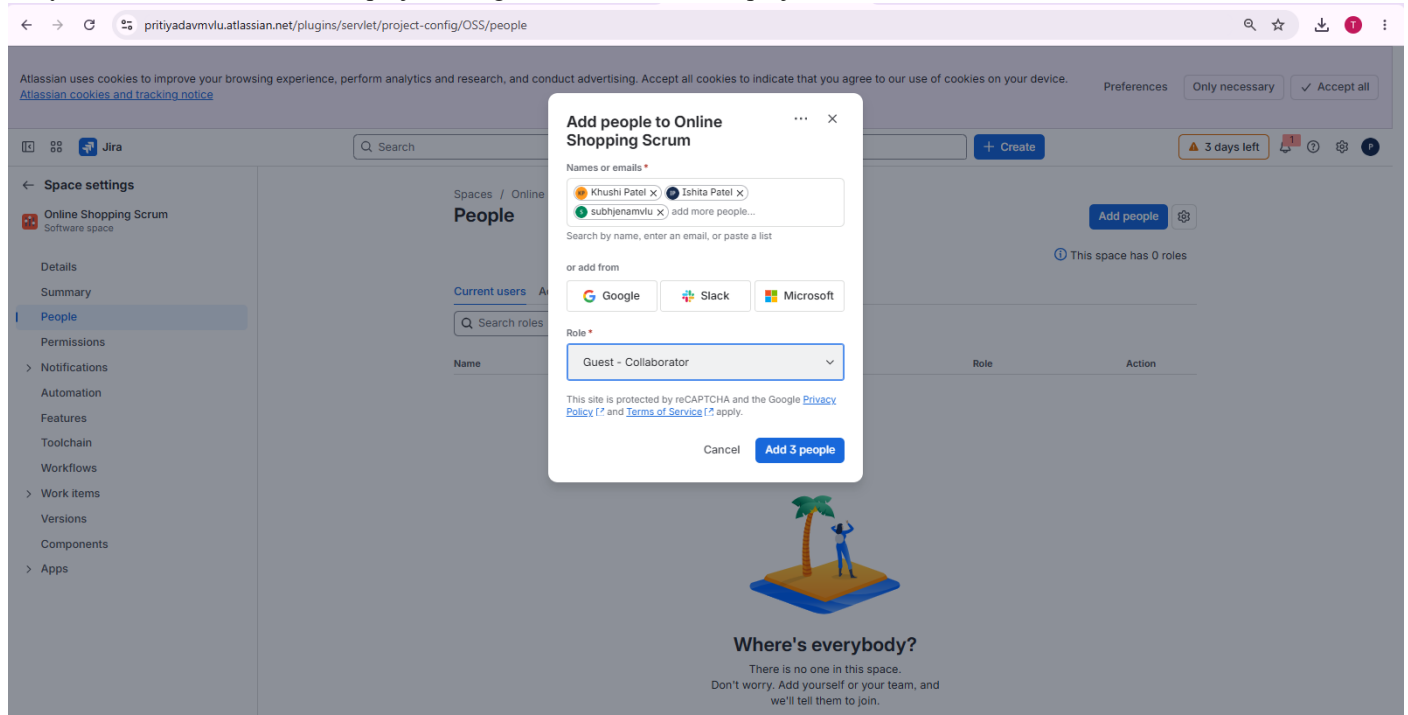

Why: The People section is used to manage users and their project roles.

Step 2: Add People

1. Click Add people.
2. Enter/select the required users.
3. If required, select more than one person.
4. Select the required Role.
5. Click Add 3 people or the appropriate Add button.

Why: This adds new users to the project and gives them the selected project role.

Step 3 : View Users

1. The People page will open.
2. Check the Current users list.
3. You can see the users and their assigned Roles.

Why: This helps us check which users already have access to the project.
