## 6. Scrum Board & Sprint Management.

### A. Create and configure Scrum Board.

#### Step 1: Create a Space

1. Log in to Jira.
2. Click Spaces from the left menu.
3. Click Create Space.

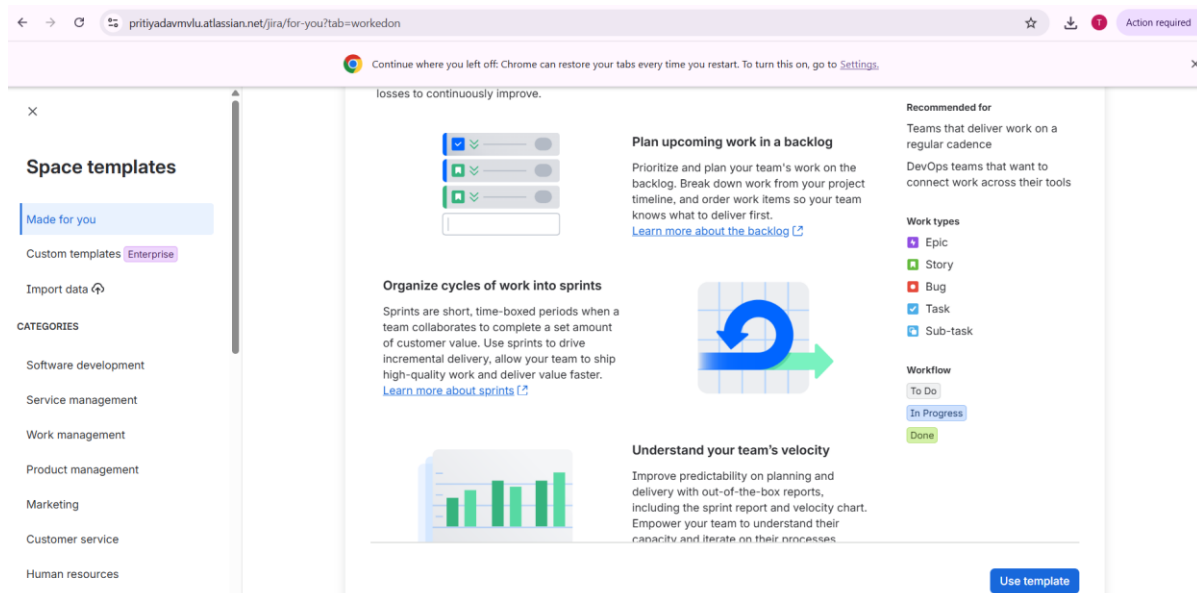

**Why:** A space/project provides a separate area for managing the work.

#### Step 2: Select Scrum Template

1. The Space templates page will appear.
2. Select Scrum.
3. Click Use template.

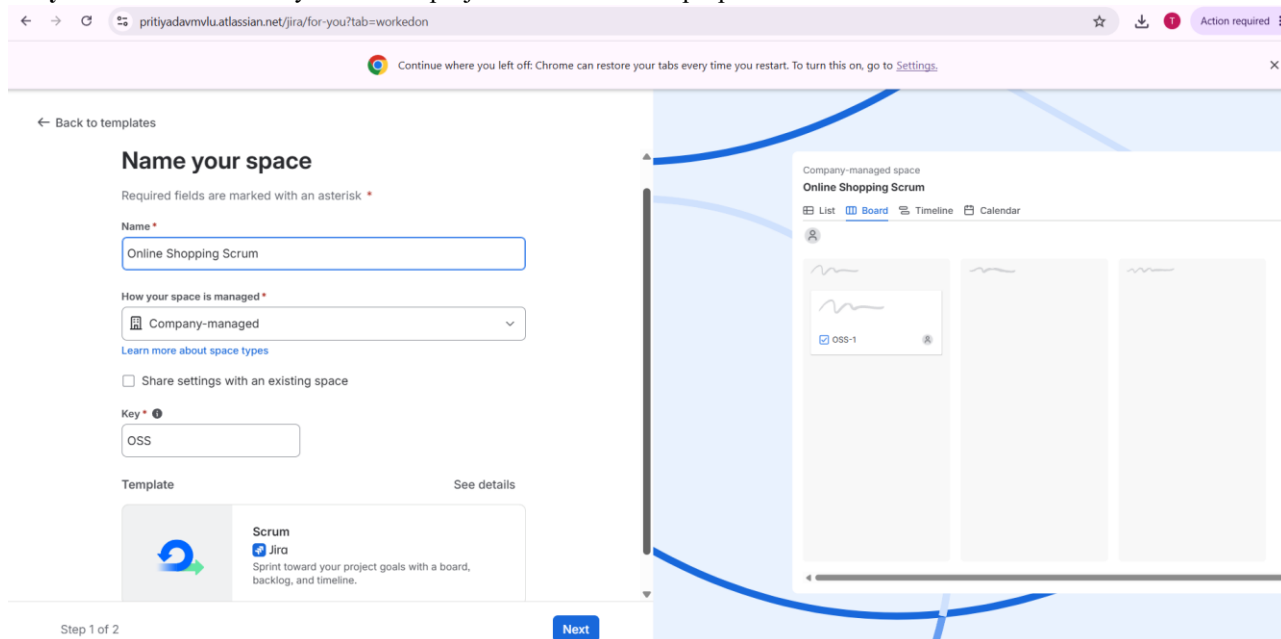

**Why:** The Scrum template provides the required Scrum features such as backlog, sprints, and Scrum board.

### Step 3: Enter Space Details

Space Name: Online Shopping Scrum and Click Next.

**Why:** These details identify the Scrum project and describe its purpose.

← Back to templates

## Name your space

Required fields are marked with an asterisk \*

Name \*  
Online Shopping Scrum

How your space is managed \*  
Company-managed  
[Learn more about space types](#)

☐ Share settings with an existing space

Key \*  
OSS

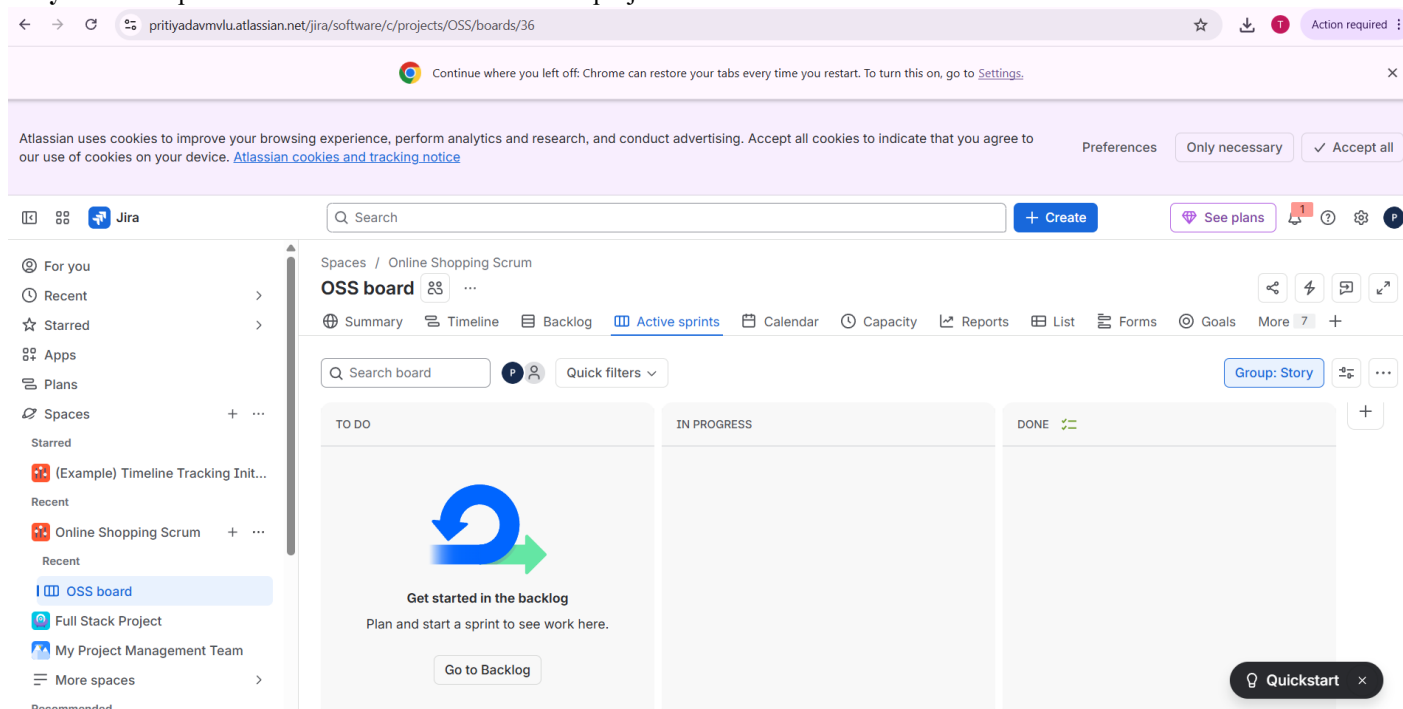

Template  
Scrum  
Jira  
Sprint toward your project goals with a board, backlog, and timeline.  
[See details](#)

Step 1 of 2 [Next](#)

### Step 4: Complete Space Creation

1. Review the details.
2. Click Create/Finish.
3. The Scrum board/dashboard will appear.

**Why:** This completes the creation of the Scrum-based project.

Quickstart

**Result:** A Scrum board was successfully created and configured for the Online Shopping Scrum project.

### B. Create and start a Sprint.

#### Step 1: Open the Backlog

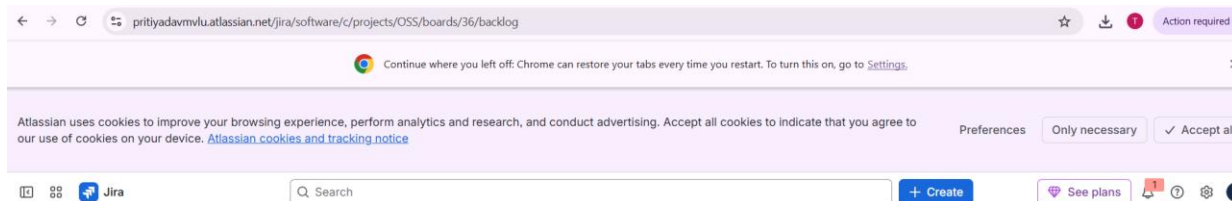

1. Open Online Shopping Scrum.
2. Click Backlog.
3. The backlog will display the available issues.

**Why:** The backlog contains the work items that can be planned for a Sprint.

#### Step 2: Create Sprint

1. In the Backlog, click Create Sprint.
2. A new Sprint, such as Sprint 1, will appear.

**Why:** A Sprint is a fixed time period in Scrum during which the team works on selected items.

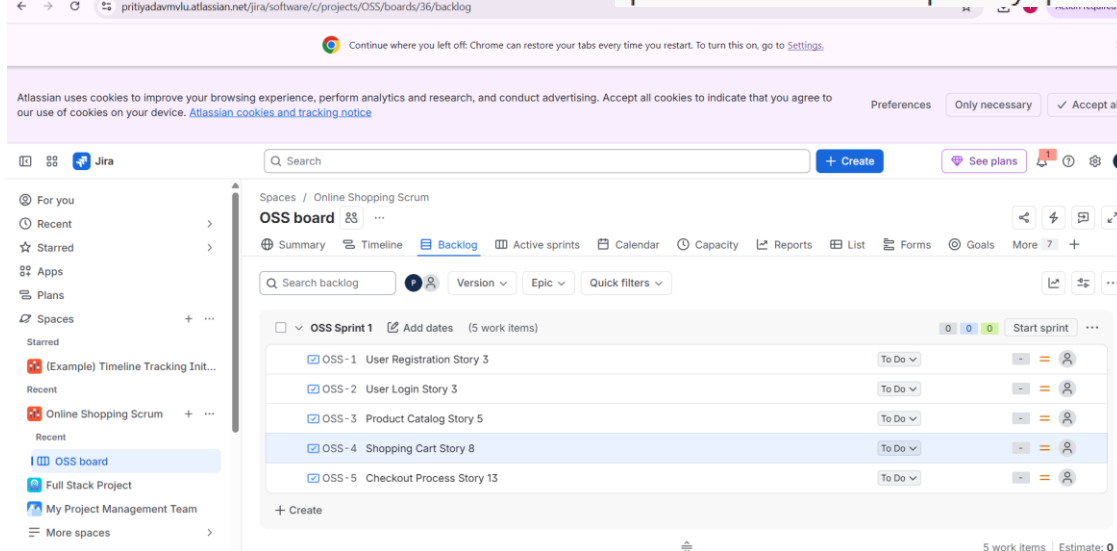

### Step 3: Add Tasks/Stories to Sprint

1. Click Create under Sprint 1.
2. Select Story as the issue type and Enter:

**Why:** Adding issues to the Sprint defines the work that the team plans to complete during that Sprint.

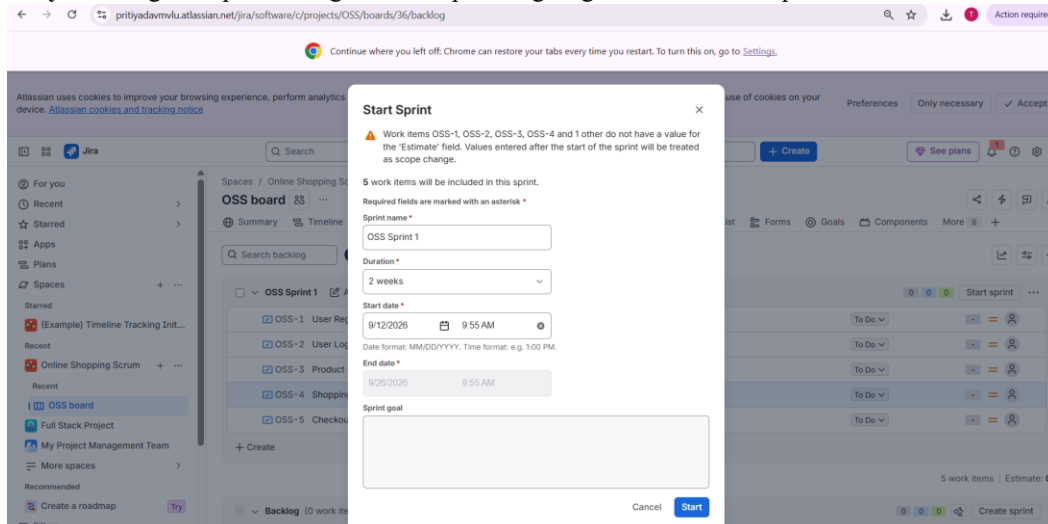

| Issue/Task        | Type  | Story Point |
|-------------------|-------|-------------|
| -----             | ----  | -----       |
| User Registration | Story | 3           |
| User Login        | Story | 3           |
| Product Catalog   | Story | 5           |
| Shopping Cart     | Story | 8           |
| Checkout Process  | Story | 13          |

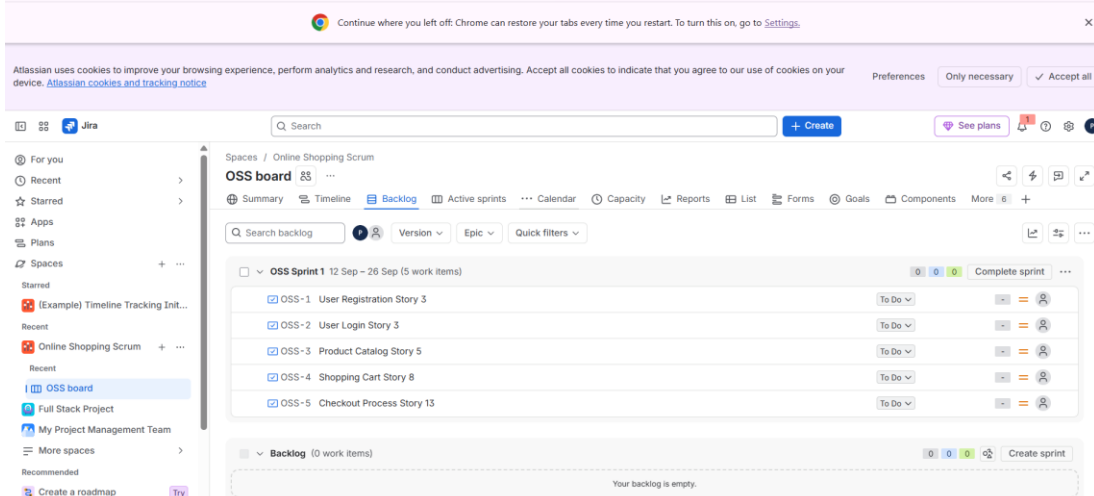

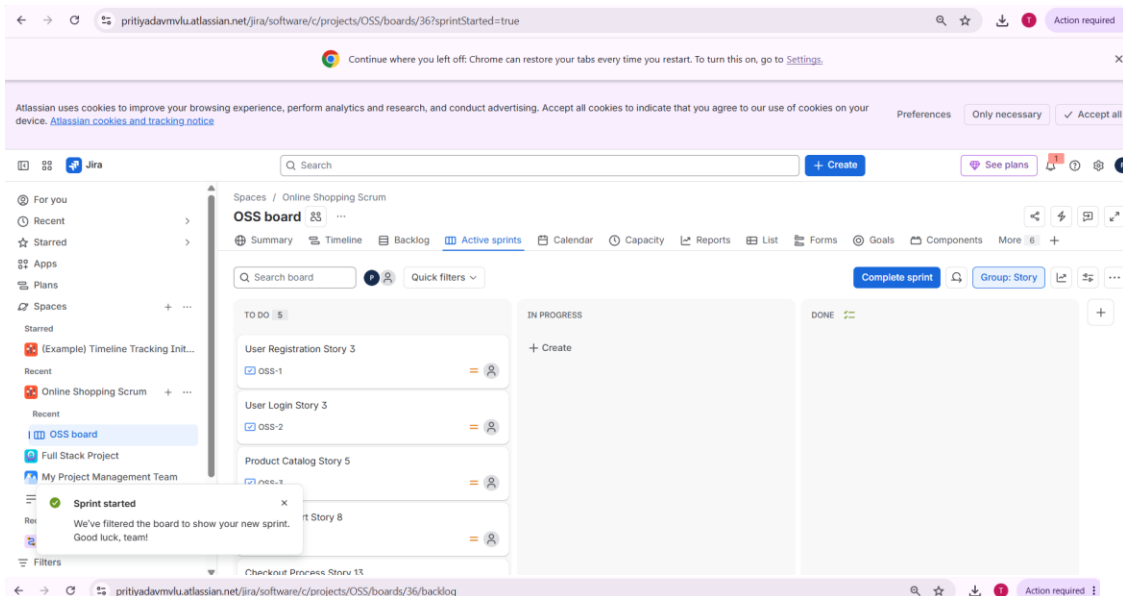

### Step 4: Start the Sprint

1. Click Start Sprint.
2. Enter the Sprint details.
3. Enter the Sprint duration/start and end dates as required and Click Start.

**Why:** Starting the Sprint changes it from planning stage to active development. The team can now work on the selected issues.

**Result:** Sprint 1 was successfully created, required Stories were added with Story Points, and the Sprint was started.

## C. Complete Sprint and generate Sprint Report.

### Step 1: Open Sprint Summary

1. Open the Scrum project and Go to Sprint Summary.

**Why:** Sprint Summary provides information about the Sprint's progress and completed work.

### Step 2: Complete the Sprint

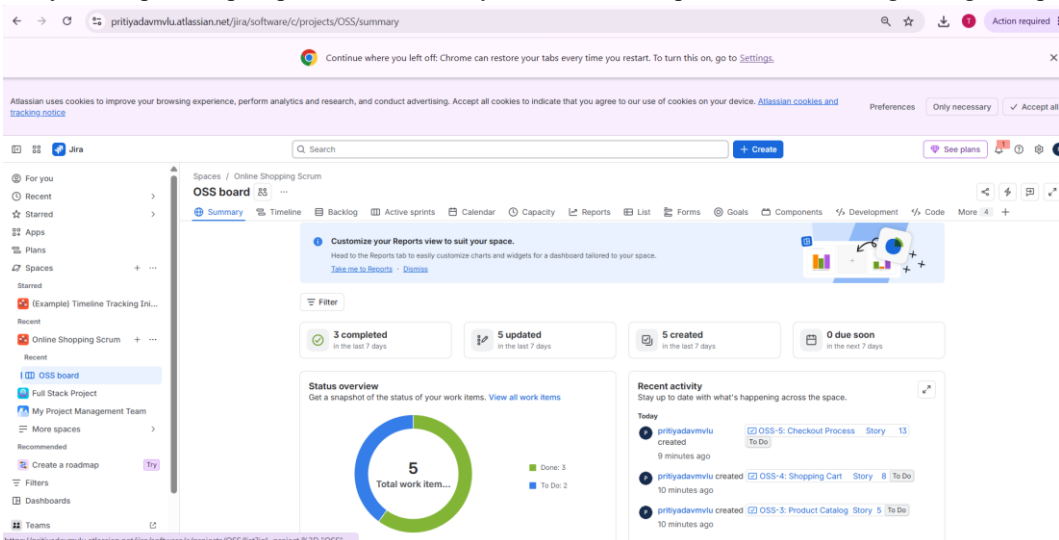

1. Open the active Sprint and Click Complete Sprint.
2. Review the issues in the Sprint and Confirm the completion.

**Why:** Completing the Sprint marks the end of the planned Sprint period and records the final Sprint status.

### Step 3: Open Reports

1. Go to the Reports section of the Scrum board and Select Sprint Report.

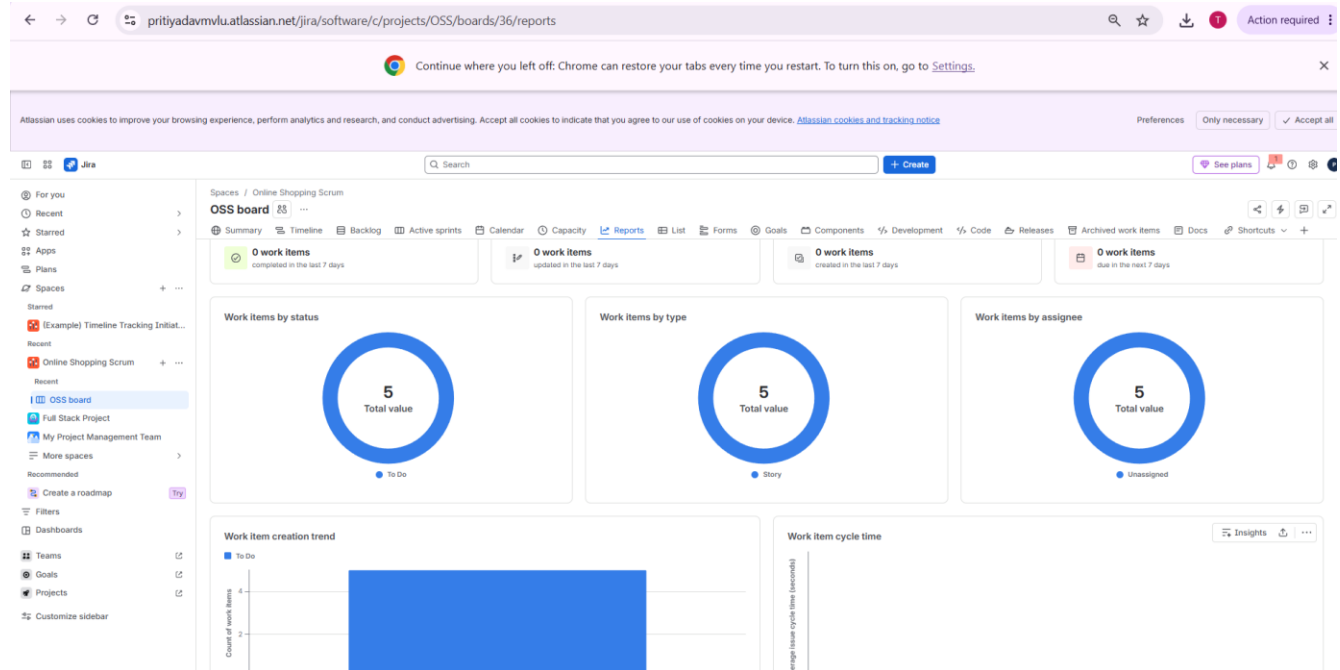

**Why:** The Sprint Report provides a summary of the work completed and remaining during the Sprint.

Check the report for:

- Completed issues
- Incomplete issues
- Story Points
- Sprint progress

**Why:** The report helps evaluate how much planned work was completed during the Sprint.

**Result:** The Sprint was successfully completed and the Sprint Report was generated to analyze Sprint performance.
