Artificial Intelligence Application Development Practical
Module - II
Practical – VII

Roll No.:T054	Name:Priti Yadav
Class:TYIT	Batch:2
Date of Assignment: 12/09/26	Date/Time of Submission: 12/09/26

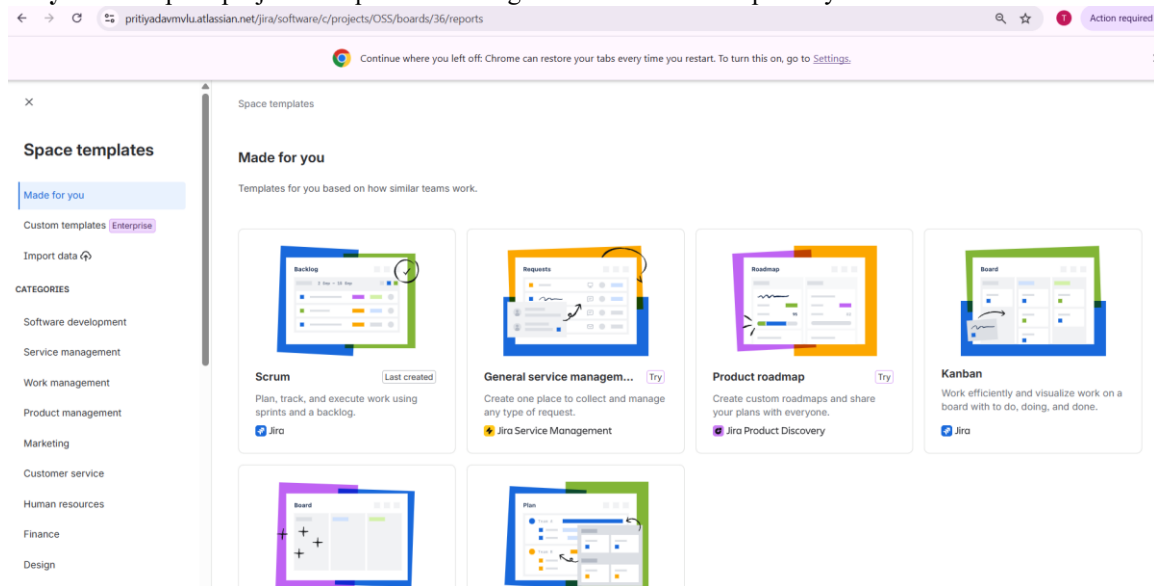

7. Kanban Board Management.

A. Create a Company-managed Kanban Project.

Step 1: Open Jira

1. Open Jira.
2. Click Spaces from the left-side menu.
3. Click Create Space.

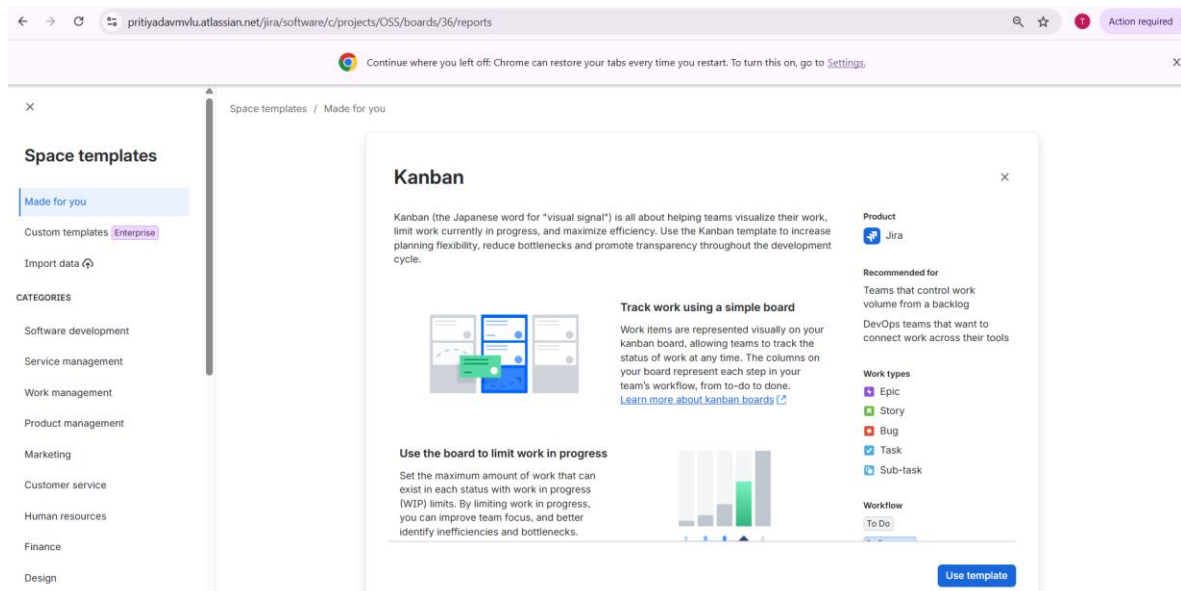

Why: A new space/project is required to manage the Kanban work separately.

Step 2: Select Kanban Template

1. The Space templates page will open.
2. Select Kanban.
3. Click Use template.

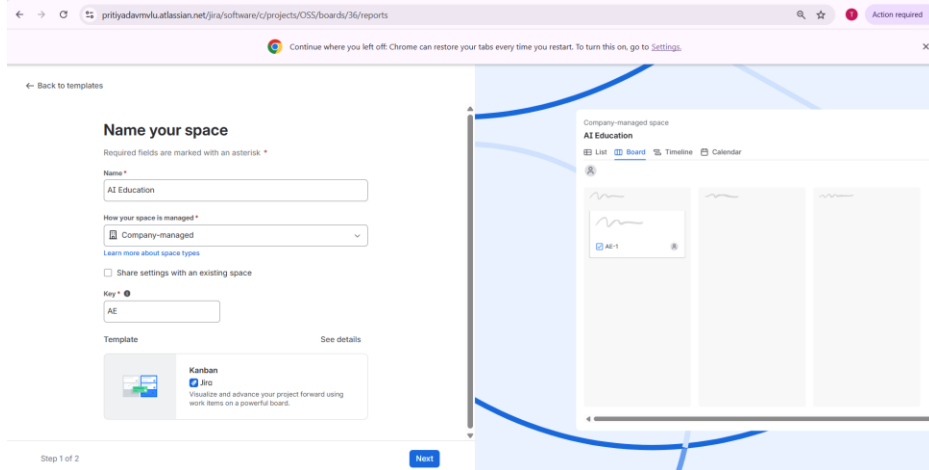

Why: The Kanban template provides a board for visually managing and tracking work items through different stages.

Step 3: Enter Project Details

Enter the required details.Space/Project Name: AI Education

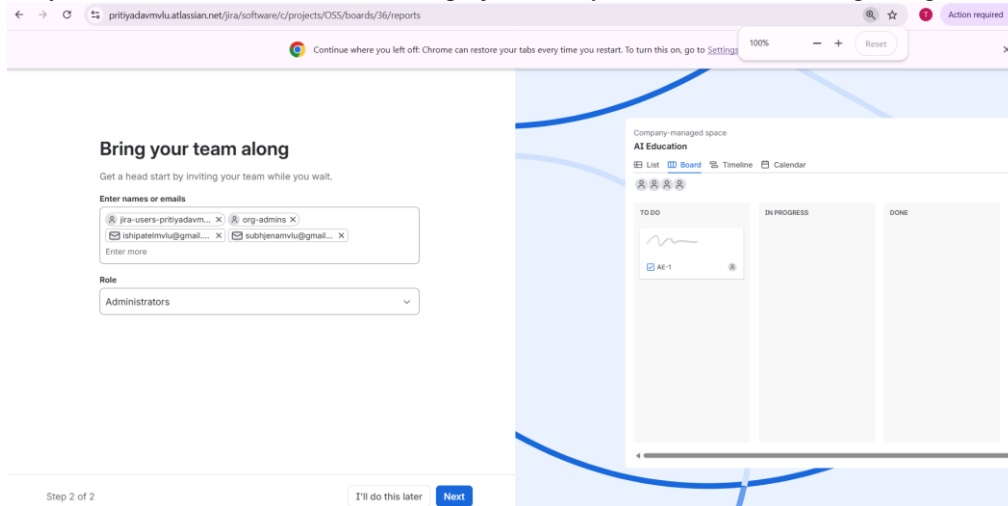

Why: Project details identify the project, while a company-managed project allows the project configuration to be centrally controlled.

Step 4: Add Team Members

1. Add the required group members.
2. Give them access to the project.
3. Click Next/Finish.

Why: Team members need access to the project so they can work on and manage assigned issues.

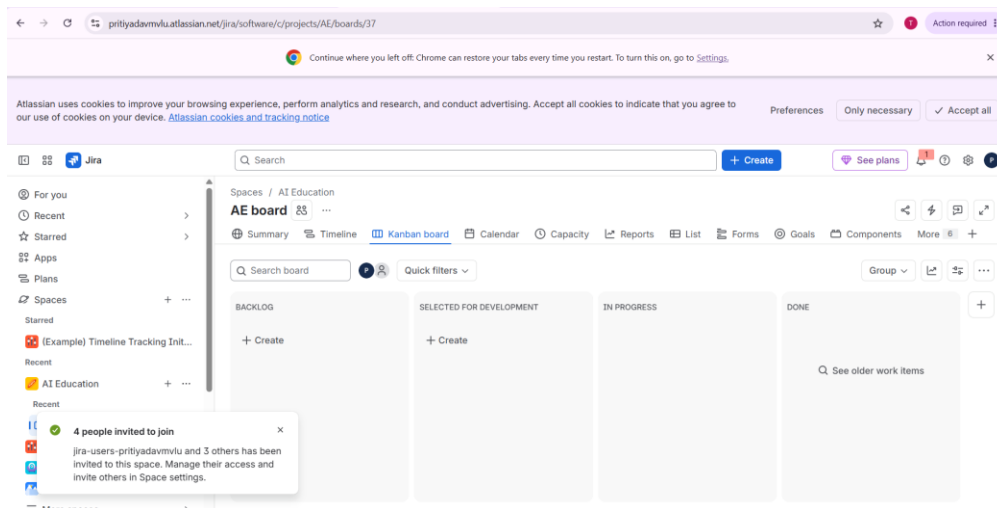

Step 5: Open the Kanban Board

1. Open the newly created AI Education project.
2. Click Kanban board.

The board will display columns such as:

Backlog → Selected for Development → In Progress → Done

Why: These columns represent the different stages of work and allow the team to track issue progress.

Result: A company-managed Kanban project named “AI Education” was successfully created.

B. Configure Kanban Board.

Step 1: Open the Kanban Board

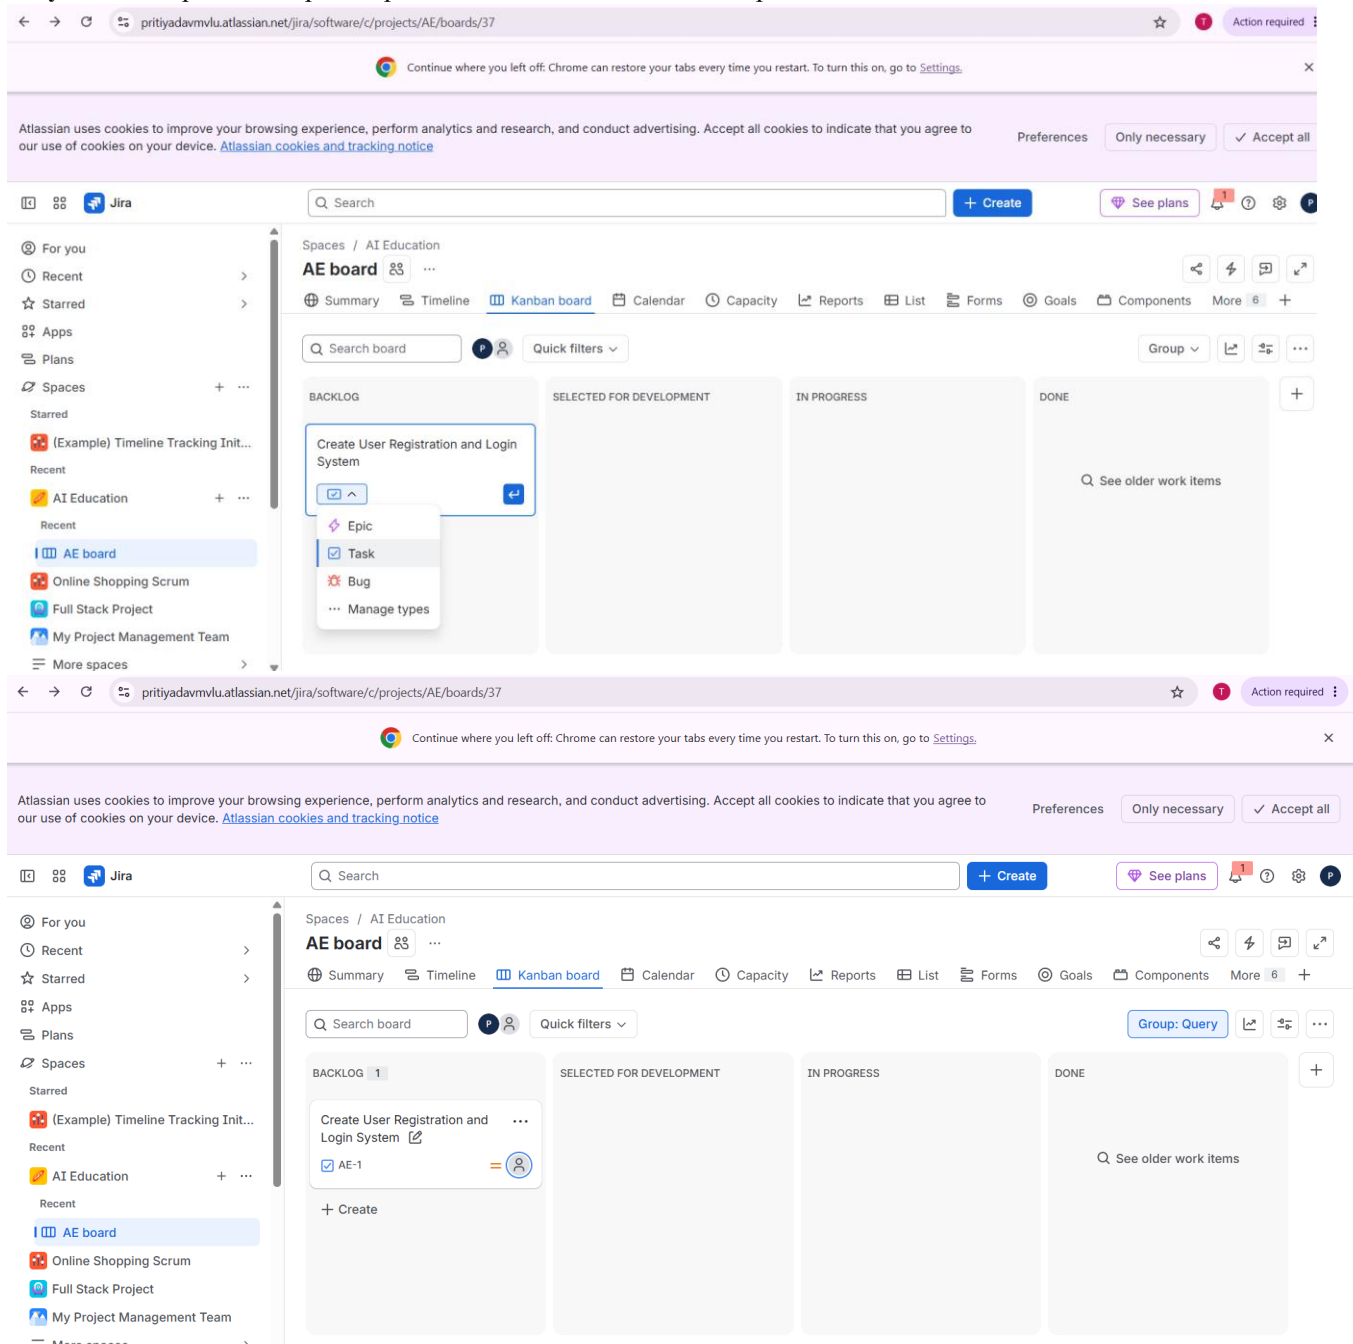

1. Open AI Education.
2. Click Kanban board.
3. Go to the Backlog.

Why: The Backlog contains work items that are waiting to be planned or started.

Step 2: Create a Task

1. Click Create.
2. In Issue Type, select Task.
3. In Summary, enter: Create User Registration and Login System
4. In Description, enter: Develop a user registration and login system that allows users to create accounts and securely log in to the application. and Click Create.

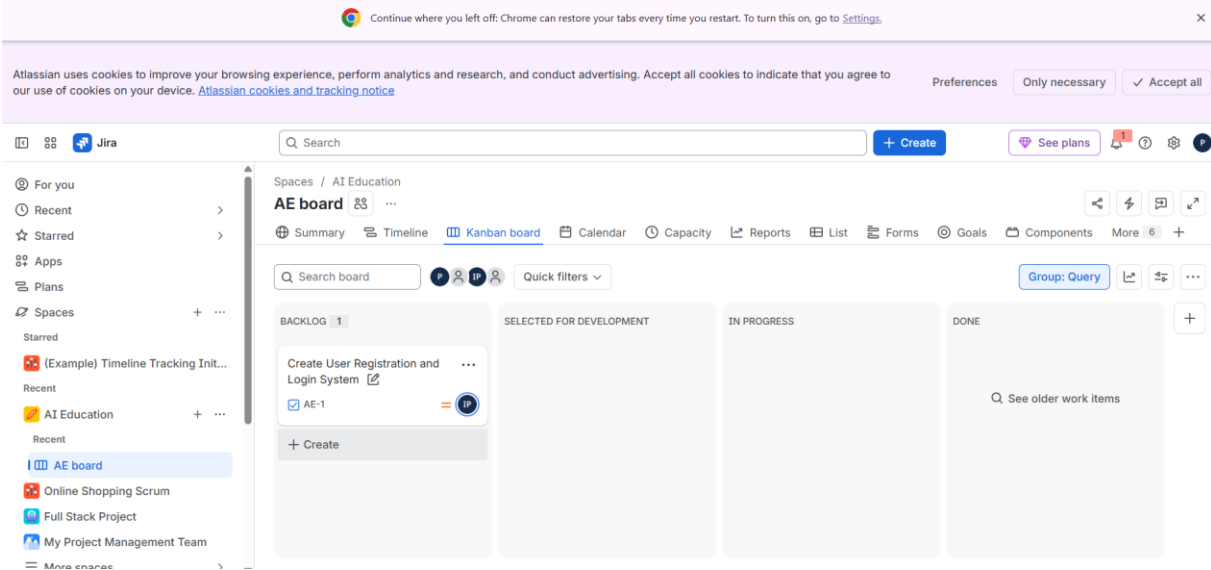

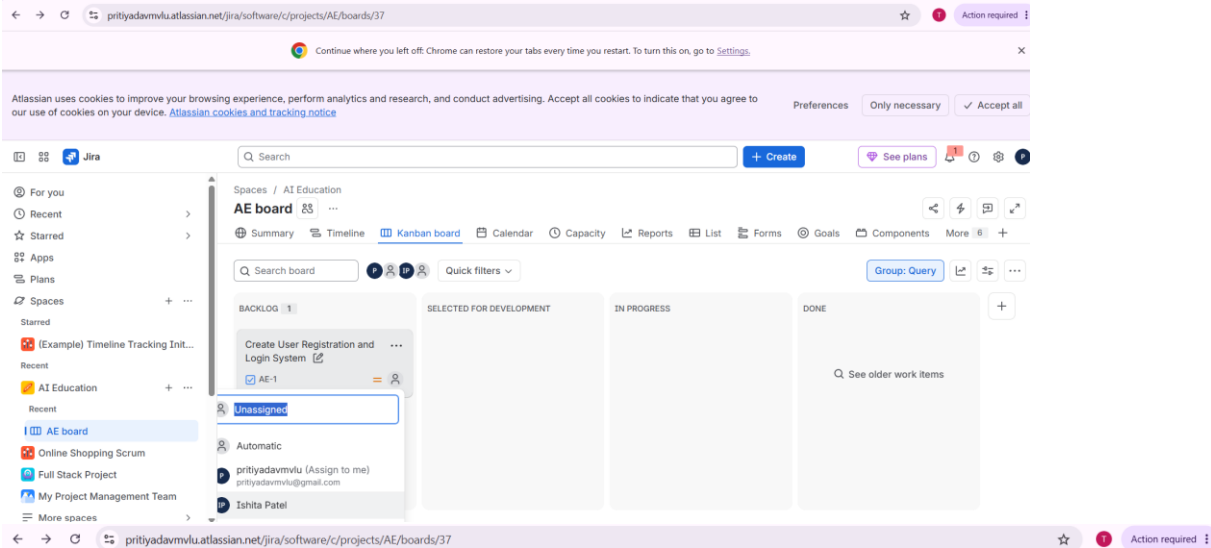

Why: A Task represents a specific piece of work that needs to be completed.

Step 3: Assign the Task to a User

1. Open Create User Registration and Login System.
2. Find the Assignee field.
3. Click Assignee.
4. Select your required group member.
5. Save/Update the issue.

Why: Assigning the issue identifies the team member responsible for completing the Task.

Step 4: Set Priority

1. Find the Priority field.
2. Click the Priority dropdown.
3. Select High.
4. Save/Update if required.

Why: Priority shows the importance or urgency of the Task and helps the team decide which work should be completed first.

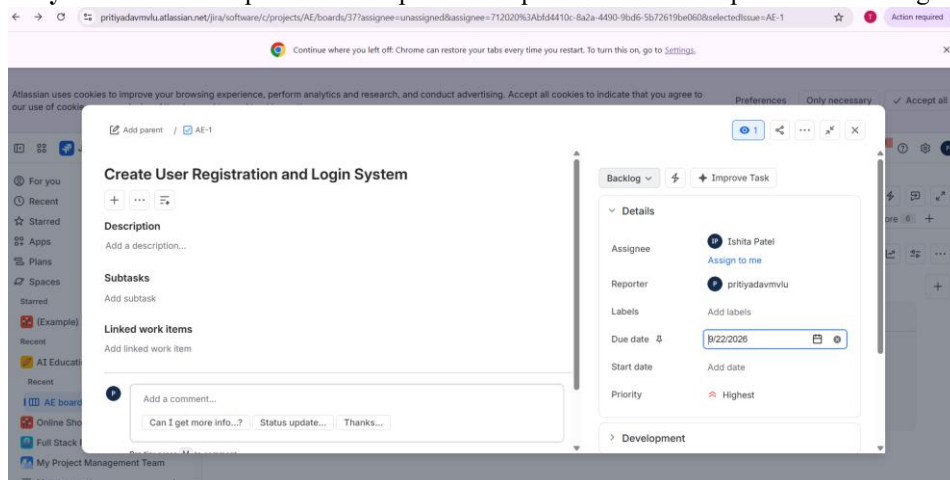

Step 5: Set Due Date

1. Find Due Date.
2. Click the date field.
3. Select a suitable date.

Suggested Due Date: 15 September 2026

4. Save/Update.

Why: The Due Date specifies the expected completion date and helps the team manage deadlines.

Step 6: Verify the Task

The screenshot displays two overlapping browser windows. The top window shows the Jira interface for the 'AE board' under the 'AI Education' space. The 'Kanban board' is selected, showing a 'BACKLOG' with one item: 'Create User Registration and Login System' (due Sep 22, 2026). The item is assigned to 'AE-1'. The bottom window shows a Gmail inbox with an email from 'prityadavmvlvlu (Jira)' assigned to the user. The email content includes the task name, assignee 'Ishita Patel', and a 'View work item' button. The email also mentions a tip to update work items without leaving the inbox.

Result: The Task was successfully created, assigned to a group member, and configured with Priority and Due Date.

C. Track issue progress and generate Control Chart.

Step 1: Open Kanban Board

1. Open AI Education and Click Kanban board.
2. Locate the Task: Create User Registration and Login System

Why: The Kanban board is used to visually track the current status of the Task.

Step 2: Move the Task to Selected for Development

1. Find the Task in Backlog and Drag and drop it into: Selected for Development

Why: This indicates that the Task has been selected for development.

Step 3: Open Reports

1. Open AI Education and Click Reports then More reports.

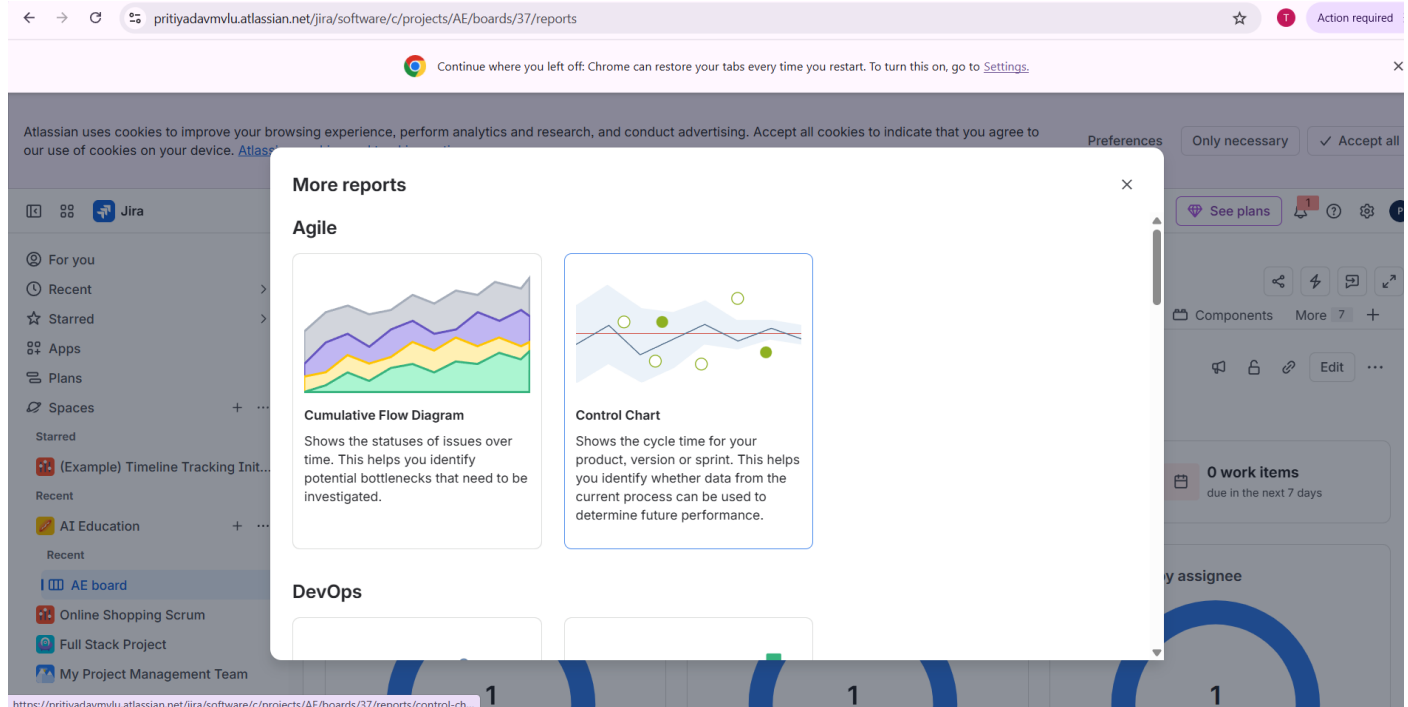

Why: Jira Reports provide graphical information about the project's work and performance.

The screenshot shows the Jira interface for the 'AE board' under the 'AI Education' space. The 'Kanban board' is selected, showing a 'BACKLOG' with one item: 'Create User Registration and Login System' (due Sep 22, 2026). The item is assigned to 'AE-1'. The board has columns for 'BACKLOG', 'SELECTED FOR DEVELOPMENT', 'IN PROGRESS', and 'DONE'. The 'SELECTED FOR DEVELOPMENT' column is currently empty.

Step 6: Open Control Chart

1. Find Control Chart in the list of reports and Click Control Chart.

Why: A Control Chart shows the cycle time of work items and helps analyze the efficiency and predictability of the workflow.

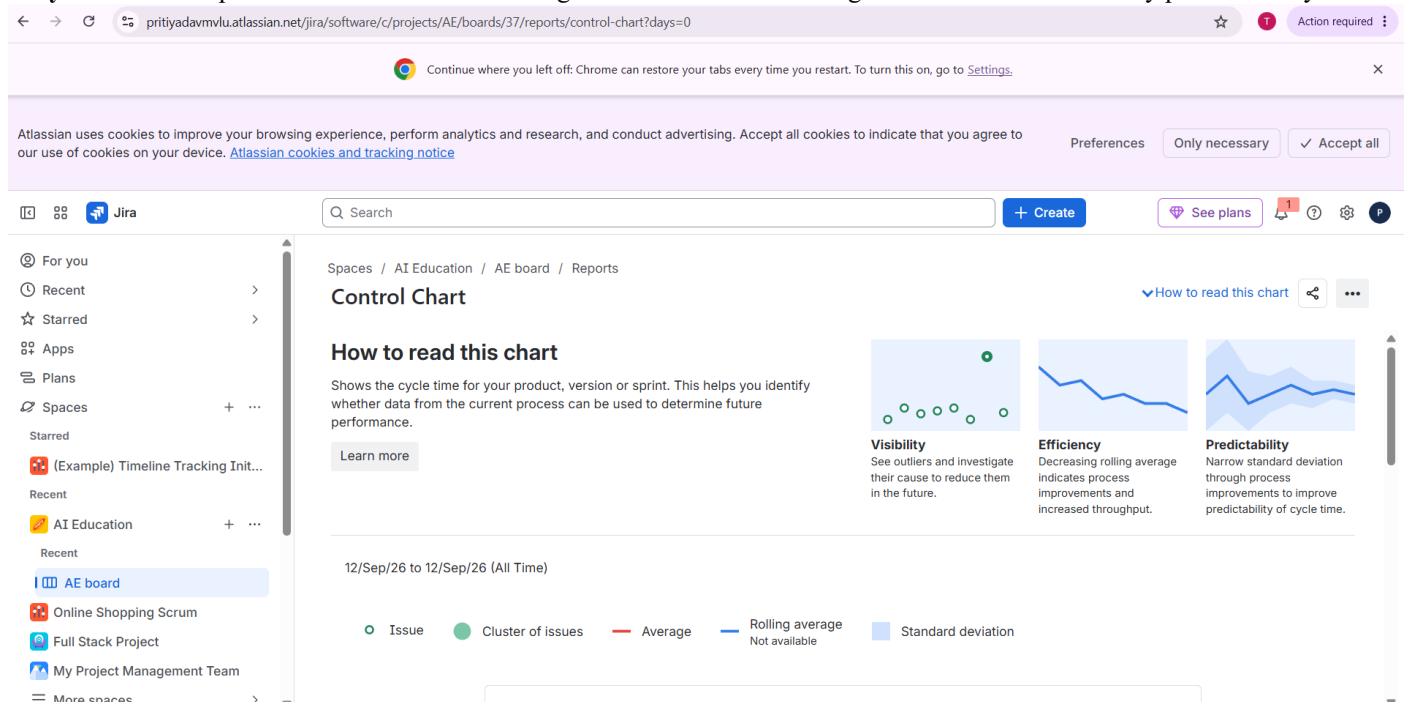

Step 7: View the Control Chart

The Control Chart displays information such as:

- Issue
- Cluster of issues
- Average
- Rolling average
- Standard deviation

Why: The chart helps the team understand how long issues take to move through the workflow and identify possible delays.

Result: The issue progress was successfully tracked on the Kanban board and the Control Chart was successfully generated.
